My Future Goals Working for an international organization, thereby allowing me to foster positive health impacts in vulnerable populations through policy, advocacy, communication or research.		
What's best about the School of Public Health and Health Services at GW Exposure to numerous agencies and organizations dedicated to improve the health of the world. Key players include the World Bank, IMF, USAID. There are multiple events on a daily basis, addressing various health issues, most events are free, and students are given the opportunity to interact with Public Health professionals .		
What's best about living in the Washington, DC Area Cultural diversity, multiple colleges/universities, proximity to New York, Philadelphia, Delaware, and New Jersey		

My message to applicants

GWU is definitely a leader in the field of Public Health! The school has a genuine interest in students' academic well-being, and its location in the heart of key decision makers has been very valuable. One of the best features offered at GWU is the opportunity to hear numerous guests speakers who are leaders in their field. Grand Rounds also offers great lecturers, from great organizations (i.e.: Julie Gerberding from the CDC). Students are very diverse and friendly. Fun activities are always being held by different student organizations.
